Work will start daily at 07:00 AM and end by 04:00 PM.

Work will be conducted Monday through Friday.

Winter Road Conditions

[BACK TO TOP](#)

Winter road conditions represent the current condition of major roads in Missouri with respect to the impact from winter precipitation. There are four (4) conditions: clear, mostly clear, partly covered and covered. If a road is bad enough that it warrants a closure, a traffic impact will be entered (see [Traffic Impacts](#) at the top of this report.) A description of three of the conditions (covered, partly covered and mostly clear) can be found at this MoDOT web page: [Winter Driving](#). Below is a table of all winter road condition records. It is sorted according to type of road (interstates first and then lesser roads follow) and road name. The table contains (from left-to-right):

- Route Name: Includes a graphic shields to help describe the route type.
- Narrative Location: This is typically stated as 'start location' TO 'end location':
- Road Condition: The current condition of the road according to the four

categories above.

- Last Update: The date and time that the last update occurred.

Route	Location	Road Condition	Last Update
	MO 47 (Warren) TO RT W / T (St. Charles)	 CLEAR	10-25-2026 at 03:10 AM
